

Reflective plate 210 x 297 mm (orange)

Part No. 500113

The reflective aluminium target plate provides a defined measuring target to improve conditions for signals reflected to the DLS/FLS measuring device. It must be used for distances greater than 65 meters. These target plates work over distances of about 25 m to 150 m for the DLS and 0.5 m to 500 m for the FLS.

Size: 210 x 297 mm
Thickness: 1.5 mm
